

Well-Prepared National Society Self Assessment (WPNS) Phase III 2009–2011

Introduction

Disaster Management is embodied within two of the four core areas of Strategy 2010 as Disaster Preparedness and Disaster Response, and represents a considerable proportion of the core activities of a National Society.

Phase III of the well-prepared National Society self-assessment will be carried out over the period 2009–2011. The zones and National Societies across the globe are committed to the implementation of DM programmes ranging from information and awareness raising, assessment, community-based initiatives, disaster risk reduction (including food security), climate change adaptation, shelter, early recovery, disaster response among others. The information gathered through WPNS enables us to develop indicators to measure performance and impact and initiate processes to build on existing capacities.

Building on lessons learned from Phase I and II and following the recommendations from National Societies and technical departments, the questionnaire has been revised for Phase III to make it as comprehensive as possible and better reflect emerging issues in DM.

Since the questionnaire is has also integrated elements of safer access, the terms *Emergency Preparedness* (EP) and *Emergency Response* (ER) have been used instead of *disaster preparedness* and *disaster response*¹. This is to provide a more relevant descriptive term, within the questionnaire, that can include disasters of a natural and conflict-related nature.

Some Information about How to Complete the Questionnaire

- National Society senior leadership is encouraged to appoint a small focus group of relevant Disaster Management paid staff and volunteers to undertake the completion of the questionnaire. This will increase the validity through inclusiveness.
- The specific methodology suggested is for the group leader to operate the discussion of each question by the focus group and then one person enter the responses agreed on by the group.
- Where 'yes'/'no' answers are requested; only one of the boxes should be marked. Some questions offer a number of possible responses so there need to be a number of marks against the boxes concerned.
- If the range of options given in a particular question does not include a factor relevant to your National Society, enter it into section marked 'other'.
- If there is lack of clarity around a given question, we suggest that you contact your country/regional delegate to clarify the context of the question. Alternatively, you may contact Aradhna Duggal at aradhna.chadha@ifrc.org

Once the questionnaire has been completed, a National Society Senior Leadership² person should be responsible for ensuring that it is signed off and dated as an accurate reflection of the National Society's Disaster Management status. (See the last page of the questionnaire).

NOTE: The feed back received through this questionnaire will be treated as confidential. If the Secretariat is approached to use the analysis for a given National Society, the data will be shared only after the Secretariat has received written approval from leadership of the National Society concerned.

¹ This does not mean that national societies have to change the name of their programmes.

² It is recognized that in some National Societies, this person will be the role of the Secretary General.
