Myanmar Red Cross Society (MRCS), in close coordination with the Ministry of Health and Sports (MoHS), has mobilized a large number of Red Cross volunteers to support the MoHS activities to prevent COVID-19. Recently, MRCS conducted two Epidemic Control for Volunteers (ECV) trainings of trainers (ToT) in Naypyitaw and Yangon, inviting 60 Red Cross volunteers from all over the country. MRCS's activities focus on awareness raising, information sharing, health education, risk communications, and psychosocial support at the community level. Additionally, MRCS has been supporting MoHS in screening people in migration entry & exit points as well as in community-based surveillance measures. MRCS also distributed sanitizers, as well as procured personal protective equipment to be well prepared for possible outbreak and its impact to its frontline health volunteers working in communities. On 13 Feb 2020, MRCS launched the emergency plan of action (Required Amount: CHF 1,226,730) supported by the Movement partners. To learn more about MRCS’s activities on COVID-19, please see interactive mapping of resources and trained volunteers developed by MRCS information management department with the support of American Red Cross or MRCS social media (Facebook/Twitter).

U Aung Naing Oo, Myawaddy District, Red Cross volunteer

Myawaddy, Kayin state - “Myawaddy district has two bridges which connect Thailand and Myanmar, one of which is used by truck drivers from Thailand. The Ministry of Health and Sports (MoHS) invited MRCS to support them and trained MRCS volunteers to monitor people coming and out through this bridge. Every day, we check the temperature of the drivers and record the information where they are going with their products. They usually come in the morning and go back in the evening. Luckily, there was no person so far who was suspected to have COVID-19. However, we are still here closely monitoring. People ask me why I do this risking my own health. My answer to them is simple: I am a gatekeeper who protects people. This is what I like doing.”

Total Person Under Investigation /Suspected - 133
Confirmed - 0
Lab Negative - 123
Lab Pending - 10

Source: Surveillance Dashboard,
Global figures here.
60 Red Cross volunteers who received the Epidemic Control for Volunteers (ECV) trainings of trainers (ToT) have been spreading the knowledge in their own township, especially among vulnerable population including women and children.

**Hpa-an township, Kayin state**

“Out of 32 people in the room who were mostly women and children, only two people have heard about COVID-19. Red Cross volunteers did information session on what COVID-19 is, how it spreads, and how to prevent it.”

Daw Haymar Win, Hpa-an township Red Cross volunteer

**Maungdaw township, Rakhine state**

“I did an information session for 12 men, 5 boys, and 18 women. People in the township do not take the risk of COVID-19 very seriously, which worries me. We need more information materials and hand sanitizers to distribute in the community.”

**New guidance note & key messages**

This guide provides advice on how to include marginalized and vulnerable people in risk communication and community engagement during COVID-19 operations. Read more [here](#).

This guide provides critical considerations and checklists to keep schools safe, and ways to adapt and implement emergency plans for educational facilities. Read more [here](#).

**IFRC revised emergency appeal highlights**

On 11 February 2020, IFRC launched its revised emergency appeal for COVID-19 outbreak response. This Emergency Appeal seeks a revised total of CHF 32 million to enable the IFRC to support its membership to deliver assistance and support to communities affected or at risk of being affected by COVID-19. Assistance will be tailored to each country depending on its epidemic preparedness and response, as well as the vulnerability of particular groups of people in the community.

Currently CHF 5,036,467 is received. (Source: IFRC Go)
