### Electricity

In Indonesia the standard voltage is 230 V. The standard frequency is 50 Hz. The power sockets that are used are of type C / F (with two round holes plug). You can use your electric appliances in Indonesia, if the standard voltage in your country is in between 220V - 240V (as in the UK, Europe, Australia and most of Asia and Africa). Manufacturers take these small deviations into account. If the standard voltage in your country is in the range of 100V - 127V (as in the US, Canada and most South American countries), you need a power (voltage) converter.

To be sure, check the label on the appliance. If it states 'INPUT: 100-240V, 50/60 Hz', it can be used in all countries of the world (like chargers for tablets/laptops, photo cameras, cell phones, toothbrushes)

### Language

Bahasa Indonesia is the official language. English is commonly spoken by people living in big cities, including Bali, the younger generation and those in the tourist industry.

### Currency

The local currency is Indonesian Rupiah which is equivalent to IDR 16,200 to a US dollar. Currency can be exchanged at the airport or any bank or at the hotel or exchange bureau. Automated teller machines (ATM) are readily available.

### Additional Information

Since we have *Show Case Expo* for NS youth activities during SEA Leaders' Meeting, please kindly bring:

- Your respective National Society Uniform (Youth Cadet or Youth Uniform); we will inform you further on which day the participants should wear the uniform,
- National Society Flag, and
