Info sharing in Kachin

Health screening in border areas with China

Distribution of MoHS posters in Yangon

Learn more – Why did we educate mothers?

Update no. 5 – 3 March 2020
NORTHERN SHAN STATE - “We came to the Muse township in northern Shan state bordering China to do awareness raising sessions with mothers, using information materials from the Ministry of Health and Sports. The mothers learned about proper handwash tips and other preventive measures against COVID-19. Why did we educate mothers? Because in Myanmar culture, mothers spend much more time with children than fathers do. So once you educate mothers, they will educate their children and also their husbands. And this way, we educate more people in the village.”

Nan Mwe Hlaing, Muse township, Red Cross Volunteer (in red vest)
